

Swissphone DE920

The digital "PROFI-Pager" with even more features and functions

The most important performance features at a glance

32 RIC, each with 4 subaddresses

9 alerts/user profiles plus 1 expansion

longer independent battery operation thanks to ECO mode

3-line backlit LC Display with large character set

IP 52 protection class

Option IDEA® 128 bit encrypting

In addition to the outstanding characteristics and functions of the DE900 model, the DE920 packs even more features and functions. Just to mention a few; 32 RIC as well as 9 alerts/user profiles and 1 expansion profile. Profile selection enables the switching on and off of individual RIC. Another new feature: a frequency synthesizer using PLL technology. This offers a high degree of flexibility when adjusting the receiver frequency and thereby improves serviceability.

Moreover, the high-contrast 5mm large font display and the easy-to-use 3-button operation with scroll function

makes the DE920 one of the user-friendliest devices available.

The newly developed **ECO mode** is also integrated in the DE920's design. In idle state, the pager is set in a sleep mode and the display is switched off. Of course, the receiver remains active and ready to receive alarm signals. During ECO mode, reception sensitivity is enhanced and this useful feature further increases the contactability of the user.
